

# Expert in various transmission and conveyor solutions

# Siirtoruuvi Oy part of LEKO Group Oy

Siirtoruuvi Oy specializes in total conveyor process solutions, manufacturing screw conveyors, conveyor screws, and screw pumps.

Our expertise covers all phases of the production chain, from design to manufacturing and maintenance. Our products are used widely around the world in different fields of industry.

The long experience of Siirtoruuvi in design, structures, and manufacture helps you with your various processes in developing processability, designing new products and system applications, in project management, and in turnkey system deliveries.

One of the most important tasks is developing our key customers' product processability and transferring the latest product information into the plans. With our manufacturing know-how, good products can be made even better.

# Siirtoruuvi Consept

## 1. Projects

- Conveyor process solutions, manufacturing and consulting
- Developing the manufacturability of customer products

## 2. Standard and customized screw conveyors

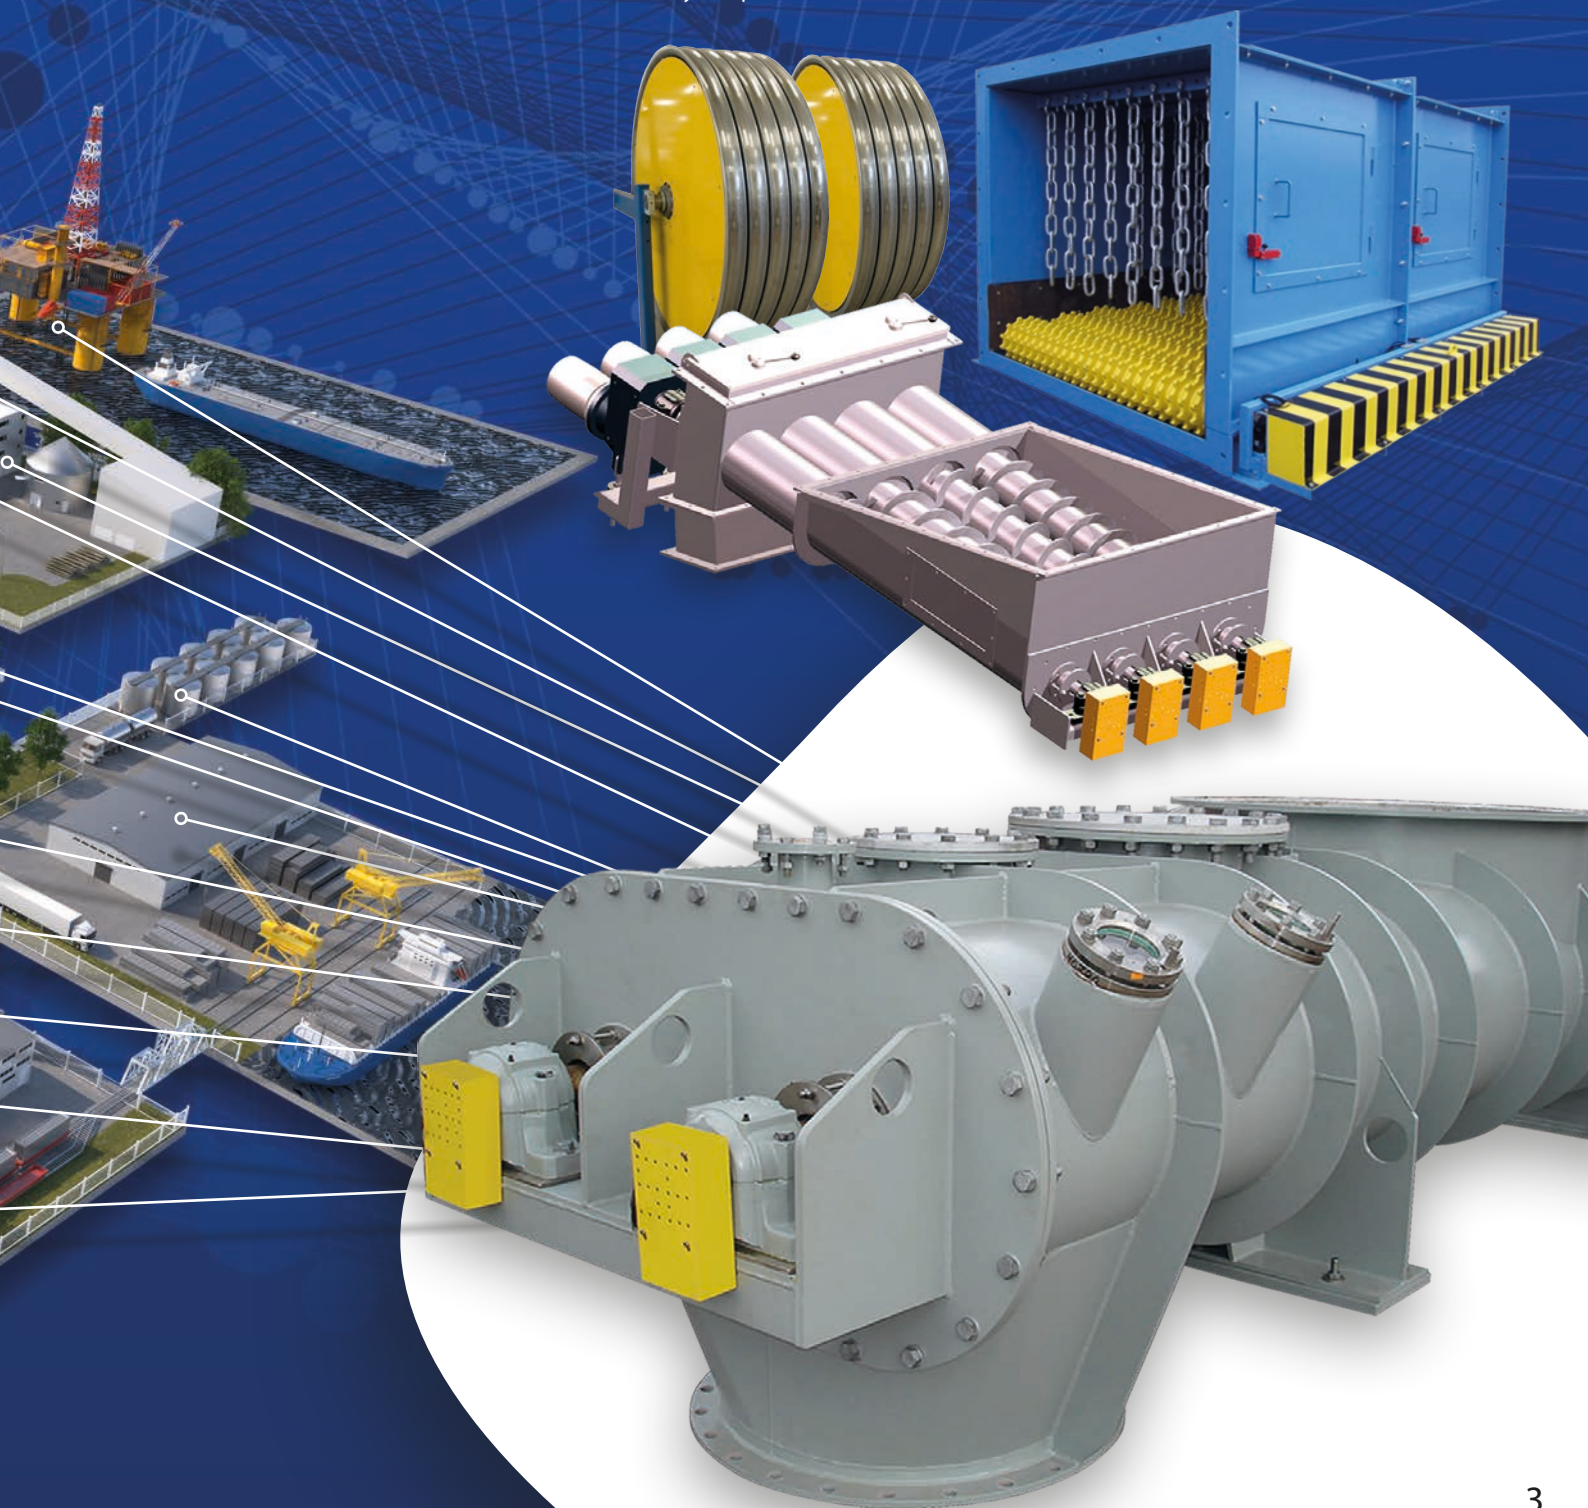

- Screw conveyors, conveyor screws and screw pumps, vertical screws, dilution screws, IUDs, screw bases, tearing screw

## 3. Conveyors and conveyor solutions

- Belt conveyors, chain conveyors, elevators, receiving bins, funnels, screens, silos, ship loading and unloading equipment ramps, supporting structures, and light and heavy service bridges

## 4. Life Cycle Support

- Spare parts deliveries and spare screws for screw conveyors including maintenance at our factory.
- conveyor repairs and modifications (also other makes)

# Total conveyor process solutions

## Finely tuned design

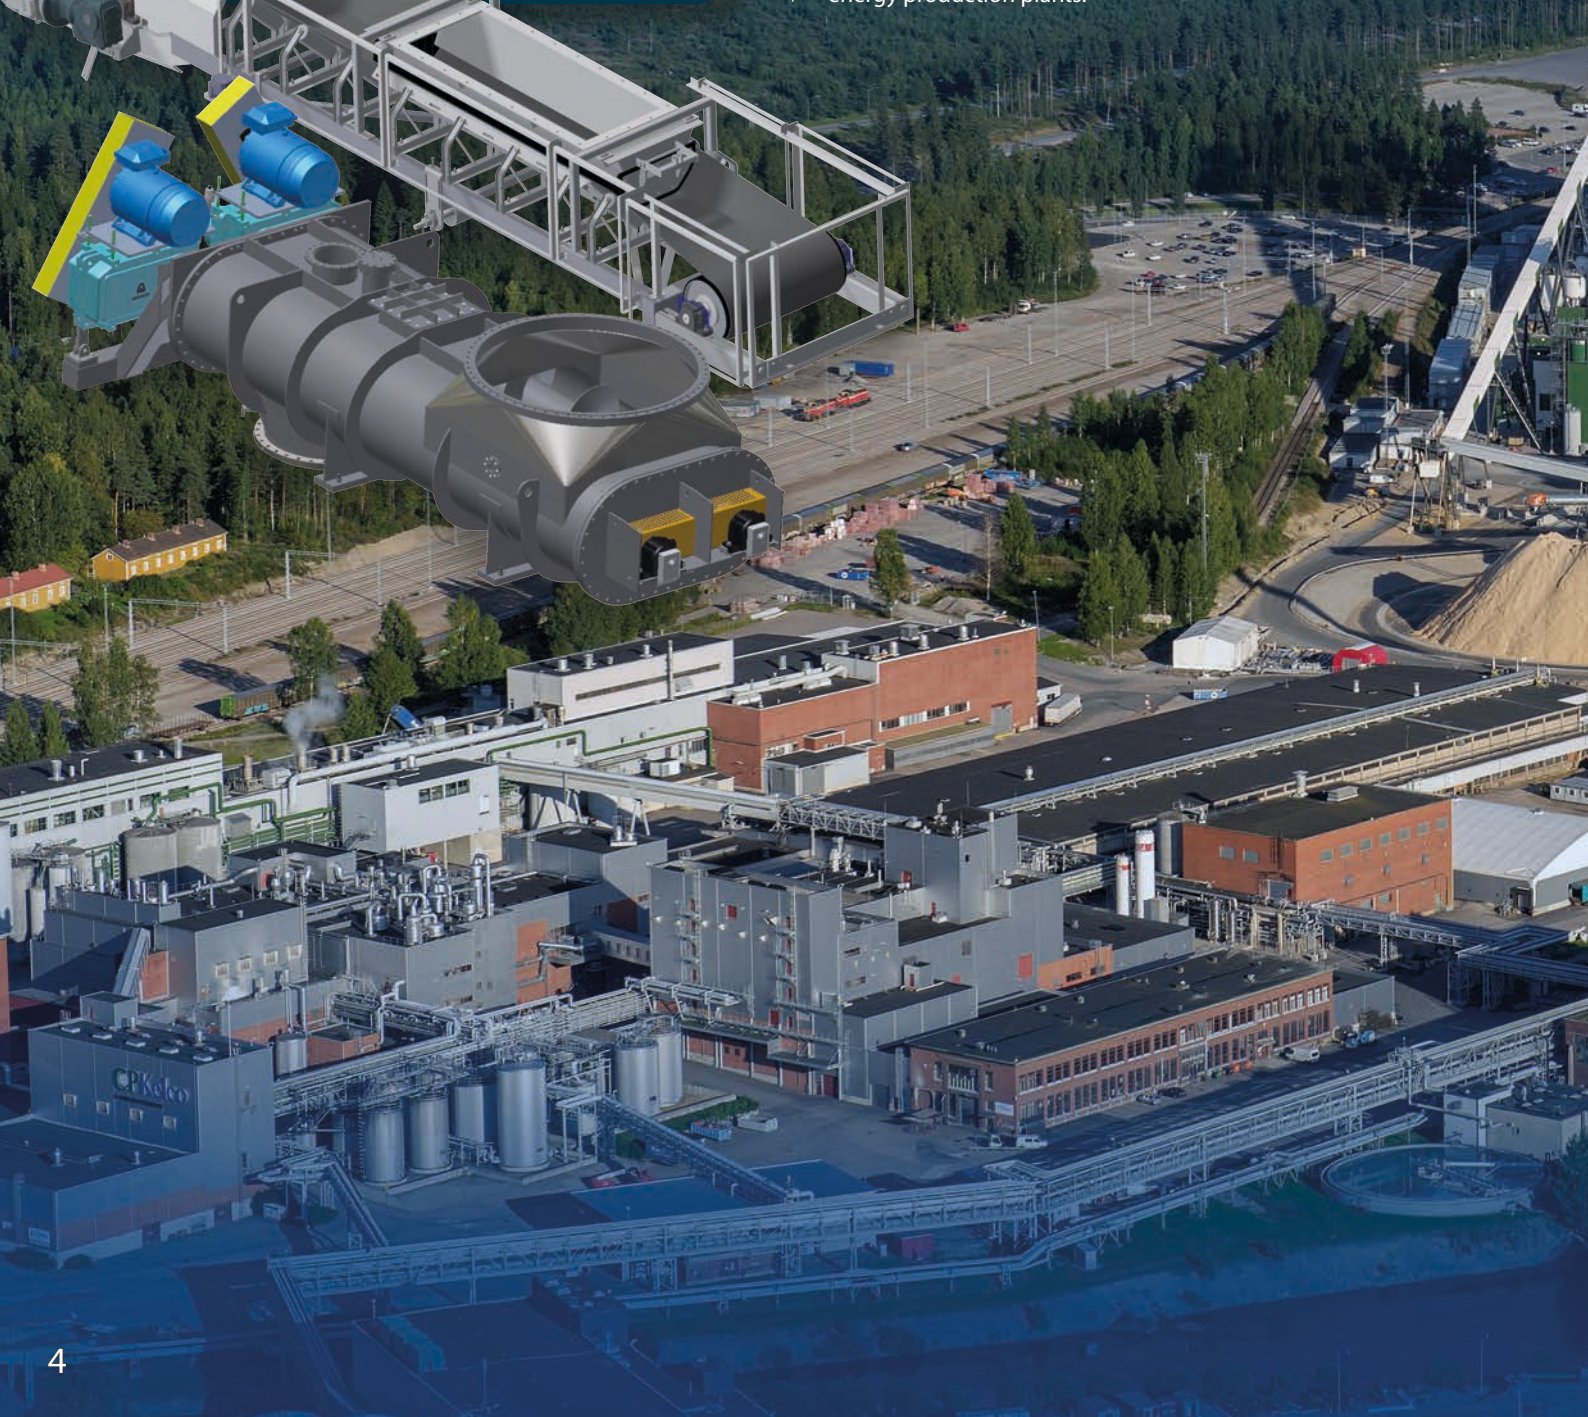

The customer's needs are our starting point: the material to be transported, its quantity and qualities, the transport distance, and the location and position of the conveyor. Our 3D design and precision-machined components guarantee that we deliver high quality.

## Full service, from planning phase to finished systems

The products we manufacture ensure excellent usability in the production processes. We can smoothly design our products in accordance with customer requirements, thanks to our investments in flexible ranges of materials and development of our production methods and technology.

## Satisfaction in many branches of industry

We have delivered our products all over the world, where they serve companies in the pulp, paper, mining, metal, food, chemical, and mechanical wood-processing industries, along with the needs of wastewater and energy production plants.

Long traditions  
in managing  
demanding  
customer  
projects

The LEKO Group Ltd consists of a heavy manufacture machine workshop, an expert in industrial design services, and groups that produce their own products. Among our own products are screw conveyors, various other conveyors and total conveyor systems, and industrial fan solutions.

### Four service areas specialized in challenging industrial solutions

Shared ownership base, joint administration, and shared business operation areas unite the strong group focusing on large-scale industrial solutions. LEKO Group Ltd companies work in a strong synergy among each other and our areas of expertise support one another. Together we are able to execute even challenging and complex projects.

### Quality to sea, ports and industrial construction

The LEKO Group Ltd has long traditions in managing demanding customer projects at sea, in docks, in fertilising industry, fossil and renewable energy production, and in industrial construction and manufacture. We are known for our quality, collaboration that stands the test of time, and an uncompromising desire to improve.

### Services

- Designing and consulting
- Full service subcontracting
- Component manufacturing and machine bodies
- Own product manufacturing
- Life cycle services
