

The LEKO Group consists of a heavy manufacture machine workshop, an expert in industrial design services, and groups that produce their own products. Among our own products are screw conveyors, various other conveyors and total conveyor systems, and industrial fan solutions.

Shared ownership base, joint administration, and shared business operation areas unite the strong group focusing on large-scale industrial solutions. LEKO Group companies work in a strong synergy among each other and our areas of expertise support one another. Together we are able to execute even challenging and complex projects.

The LEKO Group has long traditions in managing demanding customer projects at sea, in docks, in fertilising industry, fossil and renewable energy production, and in industrial construction and manufacture.

## MANUFACTURING SERVICES FOR HEAVY MACHINE INDUSTRY

The range of production areas includes system deliveries, body manufacture, and the production of complex machined components. Lehtosen Konepaja's area of special expertise is comprehensive subcontracting. We are a systems provider and manufacture customers' semi-finished products into finished products and machines.

## SUBCONTRACTING MACHINING FOR MEDIUM-HEAVY PIECES

We manufacture machine and equipment structures and components based on customer needs into installation-ready products and overall solutions. Our services also include demanding cast machining applications (tempered steel and steel casts).

## PRODUCT DEVELOPMENT, ENGINEERING, CONSULTING

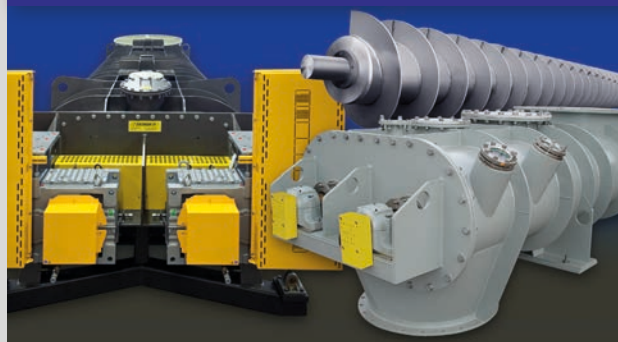

The long experience in design, structures, and manufacture helps customer with various processes in developing processability, designing new products and system applications, in project management, and in turnkey system deliveries.

## INDUSTRIA FAN SOLUTIONS FOR DEMANDING NEEDS

A comprehensive manufacturer and supplier of industrial fan services. In addition to new centrifugal fans, our offering includes extensive fan spare parts and installation services. Our particular focus area is tailored fan solutions by meeting the customer's exact specifications.

## BROAD ASSORTMENT OF SCREW CONVEYOR SOLUTION

We sell, design, manufacture screw conveyors for different industries and purposes. Screw conveyor is an optimal choice when an industrial process requires material to be refined, protected or isolated while being moved from one place to another.

## CONVEYORS AND CONVEYOR SYSTEMS FOR VARIOUS INDUSTRIES

We mainly deliver total conveyor process solutions, but single conveyor deliveries are also a part of our service for factory modernisation.
